Garden Friends & Foes

Hello Bloomers,

I'm Basil and I'm a friend to almost everyone here on Bloomers Island.

What is a friend? It is someone who helps you and is kind to you. Here on Bloomers Island, our friends are the Wiggly Worms.

DID YOU KNOW that worm poop helps plants grow bigger and stronger.

There are also the Bees, and Butterflies who **POLLINATE** plants. And our friends, the Ladybugs, they eat other pesky pests like **APHIDS**.

Garden foes (**ENEMIES**) eat our vegetables. Snails love lettuce and Hornworms love tomatoes.

Sometimes, the best way to get rid of a foe, is to pick them up and put them somewhere else, far away from your garden!
