Love & Respect

Hello Bloomers,

I'm Rosey Posey.

DID YOU KNOW that love and respect are the most important ingredients that plants and kids need to grow **PROPERLY**?

What does that mean for plants? It means taking care of them. Making sure they have just the right amount of water and sunshine. You have to give them a little bit of **FERTILIZER** or **COMPOST**. You can't step on them or break off their stems or pick their fruit/vegetables before they are ripe.

That would be like someone pulling your hair. That doesn't feel very good does it?

Just like plants, people need care, too. Would you like it if people **IGNORED** you? Try to talk to someone in your class that you think might be lonely.

Love & Respect

Hello Bloomers,

Rosey Posey here, again.

Let's do an experiment. Take two of the same plant, the same age, in the same size pot with the same amount of sun, and in the same soil. DID YOU KNOW that these are called the **CONTROL VARIABLES**? Don't forget to water them the same amount too.

Try talking, touching and playing music to one of the plants but ignore the other one. Which one do you think will be healthier and grow taller? After a couple weeks, measure your plants. Were you right?
